

Mrs. Eleni Bozinou graduated BSc in Biology (specialization in Genetics, Molecular Biology and Biotechnology) at the Aristotle University of Thessaloniki (Greece) (2010). She holds an MSc in "Analysis and Control of Food Products" (2017), while now she is a PhD candidate at the Dept. of Food Science and Nutrition of the University of Thessaly (Greece). She is academic fellow at the University of Thessaly since 2020, as well. She has experience in isolation and determination of antioxidant activity of extracts of natural products using "green" techniques (Pulsed Electric Field and Deep Eutectic Solvents) and microencapsulation. Moreover, she has 10 years of experience in quality control in food industries, she is a researcher (since 2018) at three European Union and Greek co-financed Operational Programs of Competitiveness, Entrepreneurship and Innovation, under the call RESEARCH - CREATE – INNOVATE, at the University of Thessaly. Additionally, she is a researcher at a cooperation program between University of Thessaly and Korres S.A- Natural Products. She has published 25 articles in international scientific journals, and 2 works in international conferences. She is also co-author in 6 more original research articles submitted for publication in international scientific journals. Finally, she is a reviewer in international scientific journals (e.g., Chemical Engineering Journal, Preparative Biochemistry & Biotechnology).
